

pip._vendor.six._LazyDescr.
__get__

pip._vendor.six.MovedModule.
__getattr__

_resolve

```
graph LR; A["pip._vendor.six._LazyDescr.__get__"] --> C["_resolve"]; B["pip._vendor.six.MovedModule.__getattr__"] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'pip._vendor.six._LazyDescr.__get__' and the bottom box contains 'pip._vendor.six.MovedModule.__getattr__'. On the right, there is a smaller, gray rectangular box with a black border containing the text '_resolve'. Two blue arrows originate from the right side of the top box and the right side of the bottom box, both pointing towards the left side of the gray box.
