

pip._vendor.rich.padding.
Padding.__rich_console__

pip._vendor.rich.box.Box.get_top

top

```
graph LR; A["pip._vendor.rich.padding.Padding.__rich_console__"] --> C["top"]; B["pip._vendor.rich.box.Box.get_top"] --> C;
```

The diagram illustrates a relationship between two Python objects and a common target. On the left, there are two rectangular boxes. The top box contains the text 'pip._vendor.rich.padding.Padding.__rich_console__'. The bottom box contains the text 'pip._vendor.rich.box.Box.get_top'. Two blue arrows originate from the right side of these boxes. The arrow from the top box points towards the top of a gray rectangular box on the right labeled 'top'. The arrow from the bottom box points towards the bottom of the same 'top' box. The 'top' box is shaded gray and has a black border.
