```
graph LR; A["pip._internal.index.sources._FlatDirectorySource.file_links"] --> D["_is_html_file"]; B["pip._internal.index.sources._LocalFileSource.file_links"] --> D; C["pip._internal.index.sources._FlatDirectorySource.page_candidates"] --> D; E["pip._internal.index.sources._LocalFileSource.page_candidates"] --> D;
```

The diagram illustrates a dependency or data flow where four different source objects from the `pip._internal.index.sources` module are used to determine if a file is an HTML file. The sources are arranged vertically on the left, and a single target box labeled `_is_html_file` is on the right. Blue arrows point from each source box to the target box.
