

make_html_tags

make_xml_tags

_makeTags

```
graph LR; A[make_html_tags] --> C[_makeTags]; B[make_xml_tags] --> C;
```

The diagram illustrates a function abstraction or refactoring. On the left, two separate functions are shown in white boxes: 'make_html_tags' (top) and 'make_xml_tags' (bottom). On the right, a single function is shown in a gray box: '_makeTags'. Two blue arrows originate from the right side of the 'make_html_tags' box and the right side of the 'make_xml_tags' box, both pointing towards the left side of the '_makeTags' box. This visualizes the concept of both specific functions delegating their logic to a more general, shared function.
