

`pip._internal.utils.logging.  
RichPipStreamHandler.emit`

`pip._vendor.rich.logging.  
RichHandler.emit`

`format`

```
graph LR; A["pip._internal.utils.logging.  
RichPipStreamHandler.emit"] --> D["format"]; B["pip._vendor.rich.logging.  
RichHandler.emit"] --> D; D --> D;
```

The diagram illustrates a flow where two different logging handlers (RichPipStreamHandler and RichHandler) both utilize a common 'format' function. The 'format' function is represented by a grey box on the right, which receives arrows from both source boxes on the left. Additionally, a curved blue arrow on the 'format' box indicates a self-loop or recursive call.
