pip._vendor.distro.distro.
LinuxDistribution.linux
_distribution

name

```
graph LR; A["pip._vendor.pyparsing.core.ParserElement.__str__"] --> D["name"]; B["pip._vendor.rich.markup.Tag.__str__"] --> D; C["pip._vendor.distro.distro.LinuxDistribution.linux_distribution"] --> D;
```

The diagram illustrates a mapping from three different source identifiers to a common 'name' attribute. Three rectangular boxes on the left, each containing a module and method path, have blue arrows pointing to a single gray rectangular box on the right labeled 'name'. The paths are: 1) 'pip._vendor.pyparsing.core.ParserElement.__str__', 2) 'pip._vendor.rich.markup.Tag.__str__', and 3) 'pip._vendor.distro.distro.LinuxDistribution.linux_distribution'.
