

collect_sources

pip._internal.models.search
_scope.SearchScope.get_formatted
_locations

find_links

```
graph LR; A[collect_sources] --> C[find_links]; B["pip._internal.models.search  
_scope.SearchScope.get_formatted  
_locations"] --> C;
```

The diagram illustrates a flow where two separate components, 'collect_sources' and a pip search scope method, both point to a 'find_links' component. The 'collect_sources' box is at the top left, and the larger pip-related box is below it. Both have blue arrows pointing to the 'find_links' box on the right.
