

pip._vendor.rich.console.
ScreenContext.__enter__

pip._vendor.rich.console.
ScreenContext.__exit__

hide_cursor

```
graph LR; A["pip._vendor.rich.console.  
ScreenContext.__enter__"] --> C["hide_cursor"]; B["pip._vendor.rich.console.  
ScreenContext.__exit__"] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'pip._vendor.rich.console.ScreenContext.__enter__' and the bottom box contains 'pip._vendor.rich.console.ScreenContext.__exit__'. On the right, there is a gray rectangular box with the text 'hide_cursor'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both methods call the 'hide_cursor' function.
