

find\_lexer\_class\_for  
\_filename

guess\_lexer\_for\_filename

\_fn\_matches

```
graph LR; A[find_lexer_class_for_filename] --> C[_fn_matches]; B[guess_lexer_for_filename] --> C;
```

The diagram illustrates a flow where two functions, 'find\_lexer\_class\_for\_filename' and 'guess\_lexer\_for\_filename', both point to a variable named '\_fn\_matches'. The variable is represented by a grey rectangular box, while the functions are in white boxes with black borders. Blue arrows indicate the direction of the flow from each function to the variable.
