

pip._internal.utils.logging.
RichPipStreamHandler.emit

pip._vendor.rich.logging.
RichHandler.emit

pip._vendor.pygments.formatter.
Formatter.format

format_unencoded

```
graph LR; A["pip._internal.utils.logging.  
RichPipStreamHandler.emit"] --> C["pip._vendor.pygments.formatter.  
Formatter.format"]; B["pip._vendor.rich.logging.  
RichHandler.emit"] --> C; C --> D["format_unencoded"]
```

The diagram illustrates a sequence of function calls. Two boxes on the left, representing different logging handlers, have arrows pointing to a central box representing a Pygments formatter. This formatter box then has an arrow pointing to a final box on the right, which represents the output function. The final box is shaded gray, while the others are white with black borders.
