

pip.\_vendor.platformdirs.android.  
Android.site\_cache\_dir

pip.\_vendor.platformdirs.android.  
Android.user\_log\_dir

pip.\_vendor.platformdirs.android.  
Android.user\_runtime\_dir

user\_cache\_dir

```
graph LR; A["pip._vendor.platformdirs.android.  
Android.site_cache_dir"] --> D["user_cache_dir"]; B["pip._vendor.platformdirs.android.  
Android.user_log_dir"] --> D; C["pip._vendor.platformdirs.android.  
Android.user_runtime_dir"] --> D;
```

The diagram illustrates a mapping from three specific Android-related paths to a common user cache directory. Three light blue rectangular boxes on the left contain the source paths: 'pip.\_vendor.platformdirs.android.Android.site\_cache\_dir', 'pip.\_vendor.platformdirs.android.Android.user\_log\_dir', and 'pip.\_vendor.platformdirs.android.Android.user\_runtime\_dir'. Three blue arrows originate from the right side of each of these boxes and converge on a single dark gray rectangular box on the right labeled 'user\_cache\_dir'.
