

pip._vendor.rich.console.
Console._detect_color_system

detect_legacy_windows

get_windows_console
_features

```
graph LR; A["pip._vendor.rich.console.  
Console._detect_color_system"] --> C["get_windows_console  
_features"]; B["detect_legacy_windows"] --> C; C --> C;
```

The diagram illustrates the flow of data into the `get_windows_console_features` function. Two external sources, `pip._vendor.rich.console.Console._detect_color_system` and `detect_legacy_windows`, are shown as boxes on the left. Blue arrows point from each of these boxes to the `get_windows_console_features` box on the right. The `get_windows_console_features` box is shaded gray, while the others are white with black borders. A curved blue arrow originates from the top of the `get_windows_console_features` box and points back to its top, indicating a self-call or a loop.
