

```
pip._internal.models.search  
_scope.SearchScope.get_formatted  
_locations
```

```
pip._internal.models.search  
_scope.SearchScope.get_index  
_urls_locations
```

index_urls

```
graph LR; A["pip._internal.models.search_scope.SearchScope.get_formatted_locations"] --> C["index_urls"]; B["pip._internal.models.search_scope.SearchScope.get_index_urls_locations"] --> C;
```

The diagram illustrates a relationship between two methods and a common attribute. Two white rectangular boxes on the left contain the method names: `pip._internal.models.search_scope.SearchScope.get_formatted_locations` (top) and `pip._internal.models.search_scope.SearchScope.get_index_urls_locations` (bottom). Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right labeled `index_urls`.
