

find_lexer_class_for
_filename

guess_lexer_for_filename

_fn_matches

```
graph LR; A[find_lexer_class_for_filename] --> C[_fn_matches]; B[guess_lexer_for_filename] --> C;
```

The diagram illustrates a flow where two functions, 'find_lexer_class_for_filename' and 'guess_lexer_for_filename', both point to a variable named '_fn_matches'. The variable is represented by a grey rectangular box, while the functions are in white boxes with black borders. Blue arrows indicate the direction of the flow from each function to the variable.
