

pip._internal.configuration.
Configuration.get_value

pip._internal.configuration.
Configuration.set_value

pip._internal.configuration.
Configuration.unset_value

_disassemble_key

```
graph LR; A["pip._internal.configuration.  
Configuration.get_value"] --> D["_disassemble_key"]; B["pip._internal.configuration.  
Configuration.set_value"] --> D; C["pip._internal.configuration.  
Configuration.unset_value"] --> D;
```

The diagram illustrates that three different methods from the `pip._internal.configuration` module—`get_value`, `set_value`, and `unset_value`—all utilize a common internal function named `_disassemble_key`. Each method is represented in a white box on the left, and the target function is in a gray box on the right. Blue arrows point from each method box to the target box.
