

`_generateDefaultName`

```
graph LR; A["_generateDefaultName"] --> B["pip._vendor.pyparsing.util._collapse_string_to_ranges"]
```

A diagram showing a call from the function `_generateDefaultName` to the function `pip._vendor.pyparsing.util._collapse_string_to_ranges`. The first function is in a grey box, and the second is in a white box with a black border. A blue arrow points from the first box to the second.

`pip._vendor.pyparsing.util.
_collapse_string_to_ranges`
