

pip._internal.network.download.
BatchDownloader.__call__

pip._internal.network.download.
Downloader.__call__

_get_http_response
_filename

```
graph LR; A["pip._internal.network.download.  
BatchDownloader.__call__"] --> C["_get_http_response  
_filename"]; B["pip._internal.network.download.  
Downloader.__call__"] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, two white rectangular boxes with black borders contain the names of methods from the `pip._internal.network.download` module: `BatchDownloader.__call__` (top) and `Downloader.__call__` (bottom). On the right, a gray rectangular box with a black border contains the names of two attributes: `_get_http_response` and `_filename`. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both `BatchDownloader.__call__` and `Downloader.__call__` interact with or depend on the attributes `_get_http_response` and `_filename`.
