

filter

```
graph LR; A[filter] --> B["pip._vendor.distlib.compat.BaseConfigurator.convert"]
```

A diagram showing a mapping from a variable named 'filter' to a specific module method. A gray box on the left contains the text 'filter'. A blue arrow points from this box to a larger white box on the right. The white box contains the text 'pip._vendor.distlib.compat.BaseConfigurator.convert'.

pip._vendor.distlib.compat.
BaseConfigurator.convert
