

Exception

```
graph BT; InvalidHeader[InvalidHeader] --> HTTPError[HTTPError]; HTTPError --> Exception[Exception];
```

The diagram illustrates a class hierarchy with three levels. At the top is a white box labeled 'Exception'. A blue arrow points from a white box labeled 'HTTPError' below it to 'Exception'. Another blue arrow points from a gray box labeled 'InvalidHeader' at the bottom to 'HTTPError'. This indicates that 'InvalidHeader' inherits from 'HTTPError', which in turn inherits from 'Exception'.

HTTPError

InvalidHeader
