

version

```
graph LR; version[version] --> path["pip._vendor.urllib3.response.HTTPResponse.connection"]
```

A diagram illustrating a variable assignment. On the left, a gray rectangular box contains the text 'version'. A blue arrow points from the right side of this box to the left side of a larger white rectangular box on the right. This white box contains the module path 'pip._vendor.urllib3.response.HTTPResponse.connection'.

`pip._vendor.urllib3.response.
HTTPResponse.connection`
