\_packages

pip.\_internal.metadata.base.  
BaseDistribution.in\_usersite

pip.\_internal.metadata.base.  
BaseDistribution.local

installed\_location

```
graph LR; A["pip._internal.metadata.base.  
BaseDistribution.in_site_packages"] --> D["installed_location"]; B["pip._internal.metadata.base.  
BaseDistribution.in_usersite"] --> D; C["pip._internal.metadata.base.  
BaseDistribution.local"] --> D;
```

The diagram illustrates the relationship between three pip BaseDistribution attributes and the installed\_location. Three light gray boxes on the left, each containing a pip attribute name, have blue arrows pointing to a single dark gray box on the right labeled 'installed\_location'. The attributes are: 'pip.\_internal.metadata.base.BaseDistribution.in\_site\_packages', 'pip.\_internal.metadata.base.BaseDistribution.in\_usersite', and 'pip.\_internal.metadata.base.BaseDistribution.local'.
