

should_build_for_install
_command

should_build_for_wheel
_command

_should_build

```
graph LR; A[should_build_for_install_command] --> C[_should_build]; B[should_build_for_wheel_command] --> C;
```

The diagram illustrates a relationship between three code elements. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'should_build_for_install' followed by '_command' on a new line. The bottom box contains the text 'should_build_for_wheel' followed by '_command' on a new line. On the right, there is a smaller, gray rectangular box with a black border containing the text '_should_build'. Two blue arrows point from the right side of the top white box and the right side of the bottom white box to the left side of the gray box, indicating that both parent methods inherit or delegate to the '_should_build' method.
