

collect_root_requirements

make_requirement_from_spec

_make_requirement_from
_install_req

```
graph LR; A[collect_root_requirements] --> C[_make_requirement_from_install_req]; B[make_requirement_from_spec] --> C;
```

The diagram illustrates a functional dependency. Two functions, 'collect_root_requirements' and 'make_requirement_from_spec', are shown on the left. Both have blue arrows pointing to a single function on the right, '_make_requirement_from_install_req'. The function on the right is highlighted with a gray background, indicating it is the target or result of the other two functions.
