

Exception

```
graph BT; TimeoutStateError[TimeoutStateError] --> HTTPError[HTTPError]; HTTPError --> Exception[Exception];
```

The diagram illustrates a class hierarchy with three levels. At the top is a white box labeled 'Exception'. A blue arrow points from a white box labeled 'HTTPError' below it to the 'Exception' box. Another blue arrow points from a gray box labeled 'TimeoutStateError' at the bottom to the 'HTTPError' box. This indicates that 'TimeoutStateError' inherits from 'HTTPError', which in turn inherits from 'Exception'.

HTTPError

TimeoutStateError
