

pip._vendor.rich.spinner.
Spinner.__rich_console__

pip._vendor.rich.spinner.
Spinner.__rich_measure__

render

```
graph LR; A["pip._vendor.rich.spinner.  
Spinner.__rich_console__"] --> D[render]; B["pip._vendor.rich.spinner.  
Spinner.__rich_measure__"] --> D;
```

The diagram illustrates a mapping from two Rich library methods to a single `render` function. On the left, two white rectangular boxes with black borders contain the method names: `pip._vendor.rich.spinner.Spinner.__rich_console__` (top) and `pip._vendor.rich.spinner.Spinner.__rich_measure__` (bottom). Two blue arrows originate from the right side of these boxes and point towards a gray rectangular box on the right labeled `render`. The top arrow starts from the right side of the top box and points to the upper part of the `render` box. The bottom arrow starts from the right side of the bottom box and points to the lower part of the `render` box.
