Spinner.\_\_rich\_measure\_\_

render

```
graph LR; A["pip._vendor.rich.spinner.  
Spinner.__rich_console__"] --> D[render]; B["pip._vendor.rich.spinner.  
Spinner.__rich_measure__"] --> D;
```

The diagram illustrates a mapping from two Rich library methods to a common `render` function. On the left, two white rectangular boxes with black borders contain the method names: `pip._vendor.rich.spinner.Spinner.__rich_console__` (top) and `pip._vendor.rich.spinner.Spinner.__rich_measure__` (bottom). Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right labeled `render`. This indicates that both `__rich_console__` and `__rich_measure__` methods delegate their rendering logic to the `render` function.
